ONE-PAGER: REAL VALUE PROTOCOL (RVP)

"Building the Physical Layer of the Metaverse"

THE VISION

The **Real Value Protocol (RVP)** is the first decentralized engine that anchors digital liquidity to **Physical Infrastructure (RWA)** and **AI Human Productivity**. We transform transaction friction into tangible civilization.

THE CORE MECHANISM (90/10 RULE)

Every transaction fee (**F**) processed by the protocol is automatically and immutably split:

- **90% Impact Fund** (**Vi**)**:** Capital injection into Solar Farms, Smart Bridges, and Open-Source AI Productivity Tools.
- **10% Protocol Treasury** (**Vt**)**:** Ensuring long-term banking stability and R&D.

WHY INVEST IN RVP?

1. **Deflationary Physical Floor:** RVT is backed by appreciating real-world assets (Steel, Sun, and Code), creating a hedge against crypto volatility.
2. **AI Productivity Multiplier:** We fund AI tools that reduce the global cost of living, increasing the real-world value of our ecosystem.
3. **The Multiplier Effect:** Every **$1M** in fees generates **$900k** in assets, projected to create **$1.35M** in local economic growth (**k**=1.5).

LIVE ON-CHAIN METRICS

- **Status:** MVP Deployed (Ethereum Sepolia).
- **Standard:** OpenZeppelin Secured (ERC-20 & Ownable).
- **Recycler Engine:** 0x261174abfb883877498a9234059ffc723e920127
- **Governance Token ($RVT):** 0xfc87D7249D2554ffa65D5be3fe7d5e7001

SCALABILITY AT A GLANCE

Volume	Physical Output	AI Utility
$1M	3,000 Solar Panels	50,000 AI Licenses
$10M	1 Smart Bridge	Open-Source Medical AI
$100M	Housing Districts	Global AI Productivity OS
